Acknowledgements

The discussion paper which led to this book was produced by the Scientific council working group on "quantitative and qualitative assessment of ecosystem services provided by water and aquatic environments". We extend our warmest thanks to the working group for its very fruitful, collective work. We are also very grateful to the members of the Scientific council for their constructive comments and lively discussions during the plenary sessions that enabled us to add to and improve the text. Particular thanks goes to Luc Abbadie, Chair of the Scientific council, Bernard Drobenko and Guy Oberlin. We would also like to thank the Onema R&D department and particularly our co-authors who contributed to this book in a very active and constructive manner and formed a highly effective team with us. Special thanks also to Véronique Barre, our editor for this work, whose gentle persistence ensured the success of this undertaking. We also wish to thank the policy officers of the R&D and the Information and communication departments who provided valuable input.

This book would not be as clear or attractive without the illustrations and we are extremely grateful to Béatrice Saurel, for the art work, and to Amandine Samuel, a trainee at the Information and communication department, for the iconographic research, as well as to the individuals and photo libraries (Onema, Ecology ministry, CNRS, INRA) who provided us with photos free of charge.

The "Comprendre pour agir"
(Knowledge for action) series publishes the
results of research and science-advice
work, for use by teachers, students,
scientists, engineers and water and
aquatic-environment managers.
